

## ASSIGNMENT 15

### Q1. Happy Cruise Lines Database

### 1) Database Happy\_Cruise\_Lines\_Database

```
mysql> show tables;
```

| Tables_in_happy_cruise_lines_database |  |
|---------------------------------------|--|
| cruise                                |  |
| passenger                             |  |
| port                                  |  |
| product                               |  |
| provision                             |  |
| ship                                  |  |
| supplier                              |  |
| tour                                  |  |
| toured                                |  |
| toured2                               |  |
| visit                                 |  |

```
11 rows in set (0.00 sec)
```

## 2)Supplier Table

create table Supplier

(

Supplier\_Number int not null primary key,

Supplier\_Name varchar(233) not null,

Supplier\_Address varchar(233) not null,

Sales\_Rep varchar(233) not null

);

```
mysql> desc supplier;
```

| Field            | Type         | Null | Key | Default | Extra |
|------------------|--------------|------|-----|---------|-------|
| Supplier_Number  | int          | NO   | PRI | NULL    |       |
| Supplier_Name    | varchar(233) | NO   |     | NULL    |       |
| Supplier_Address | varchar(233) | NO   |     | NULL    |       |
| Sales_Rep        | varchar(233) | NO   |     | NULL    |       |

4 rows in set (0.01 sec)

### 3) Product Table

create table Product

(

Product\_Number int not null primary key,

Product\_Category varchar(233) not null,

Unit\_Price float not null

);

```
mysql> desc product;
```

| Field            | Type         | Null | Key | Default | Extra |
|------------------|--------------|------|-----|---------|-------|
| Product_Number   | int          | NO   | PRI | NULL    |       |
| Product_Category | varchar(233) | NO   |     | NULL    |       |
| Unit_Price       | float        | NO   |     | NULL    |       |

3 rows in set (0.01 sec)

### 4) Ship table

```

create table Ship
(
  Ship_Number int not null primary key,
  Ship_Name varchar(233) not null,
  Ship_Builder varchar(233) not null,
  Launch_Date date not null,
  Gross_Weight float not null
);

```

```

mysql> desc ship;
+-----+-----+-----+-----+-----+-----+
| Field          | Type          | Null | Key | Default | Extra |
+-----+-----+-----+-----+-----+-----+
| Ship_Number    | int           | NO   | PRI | NULL    |       |
| Ship_Name      | varchar(233)  | NO   |     | NULL    |       |
| Ship_Builder   | varchar(233)  | NO   |     | NULL    |       |
| Launch_Date    | date          | NO   |     | NULL    |       |
| Gross_Weight   | float         | NO   |     | NULL    |       |
+-----+-----+-----+-----+-----+-----+
5 rows in set (0.01 sec)

```

## 5) Cruise Table

```

create table Cruise
(
  Cruise_Number int not null primary key,
  start_date date not null,
  end_date date not null,
  cruise_director varchar(233) not null
);

```

);

```
mysql> desc cruise;
```

| Field           | Type         | Null | Key | Default | Extra |
|-----------------|--------------|------|-----|---------|-------|
| Cruise_Number   | int          | NO   | PRI | NULL    |       |
| start_date      | date         | NO   |     | NULL    |       |
| end_date        | date         | NO   |     | NULL    |       |
| cruise_director | varchar(233) | NO   |     | NULL    |       |

4 rows in set (0.01 sec)

## 6) Provision Table

create table provision

(

Supplier\_Number int not null,

Product\_Number int not null,

Cruise\_Number int not null,

Quantity int not null,

Date date not null,

Cost float not null,

foreign key(Supplier\_Number) references Supplier(supplier\_number),

foreign key(Product\_Number) references Product(product\_number),

foreign key(Cruise\_Number) references Cruise(Cruise\_Number)

);

```
mysql> desc provision;
```

| Field           | Type  | Null | Key | Default | Extra |
|-----------------|-------|------|-----|---------|-------|
| Supplier_Number | int   | NO   | MUL | NULL    |       |
| Product_Number  | int   | NO   | MUL | NULL    |       |
| Cruise_Number   | int   | NO   | MUL | NULL    |       |
| Quantity        | int   | NO   |     | NULL    |       |
| Date            | date  | NO   |     | NULL    |       |
| Cost            | float | NO   |     | NULL    |       |

6 rows in set (0.01 sec)

## 7)Port Table

create table Port

(

port\_Name varchar(233) not null,

Country varchar(233) not null,

Number\_of\_Docks int not null,

Port\_Manager varchar(233),

primary key(port\_Name,Country)

);

```
mysql> desc port;
```

| Field           | Type         | Null | Key | Default | Extra |
|-----------------|--------------|------|-----|---------|-------|
| port_Name       | varchar(233) | NO   | PRI | NULL    |       |
| Country         | varchar(233) | NO   | PRI | NULL    |       |
| Number_of_Docks | int          | NO   |     | NULL    |       |
| Port_Manager    | varchar(233) | YES  |     | NULL    |       |

4 rows in set (0.01 sec)

## 8)Visit Table

create table visit

(

Cruise\_Number int not null,

Port\_Name varchar(233) not null,

Country varchar(233) not null,

Arrival\_Date date not null,

Departure date not null,

foreign key(Port\_Name,Country) references Port(Port\_Name,Country),

foreign key(Cruise\_Number) references Cruise(cruise\_number)

);

```
mysql> desc visit;
```

| Field         | Type         | Null | Key | Default | Extra |
|---------------|--------------|------|-----|---------|-------|
| Cruise_Number | int          | NO   | MUL | NULL    |       |
| Port_Name     | varchar(233) | NO   | MUL | NULL    |       |
| Country       | varchar(233) | NO   |     | NULL    |       |
| Arrival_Date  | date         | NO   |     | NULL    |       |
| Departure     | date         | NO   |     | NULL    |       |

```
5 rows in set (0.01 sec)
```

## 9) Passenger Table

create table passenger

(

passenger\_Number int not null primary key,

Passenger\_Name varchar(233) not null,

Home\_Address varchar(233) not null,

Telephone int not null,

passenger\_Numberr int not null,

foreign key(passenger\_numberr) references passenger(passenger\_Number)

);

```
mysql> desc passenger;
```

| Field             | Type         | Null | Key | Default | Extra |
|-------------------|--------------|------|-----|---------|-------|
| passenger_Number  | int          | NO   | PRI | NULL    |       |
| Passenger_Name    | varchar(233) | NO   |     | NULL    |       |
| Home_Address      | varchar(233) | NO   |     | NULL    |       |
| Telephone         | int          | NO   |     | NULL    |       |
| passenger_Numberr | int          | NO   | MUL | NULL    |       |

```
5 rows in set (0.00 sec)
```

## 10) Toured Table

```
create table toured
```

```
(
```

```
    passenger_number int not null,
```

```
    cruise_Number int not null,
```

```
    cabin_Number int not null,
```

```
    Fare varchar(233) not null,
```

```
    foreign key(passenger_number) references passenger(passenger_number),
```

```
    foreign key(cruise_number) references cruise(cruise_number)
```

```
);
```

```
mysql> desc toured;
```

| Field            | Type         | Null | Key | Default | Extra |
|------------------|--------------|------|-----|---------|-------|
| passenger_number | int          | NO   | MUL | NULL    |       |
| cruise_Number    | int          | NO   | MUL | NULL    |       |
| cabin_Number     | int          | NO   |     | NULL    |       |
| Fare             | varchar(233) | NO   |     | NULL    |       |

```
4 rows in set (0.00 sec)
```

## 11) Tour Table

create table tour

(

tour\_number int not null primary key,

tour\_Name varchar(233) not null,

Duration varchar(233) not null,

price float not null

);

```
mysql> desc tour;
```

| Field       | Type         | Null | Key | Default | Extra |
|-------------|--------------|------|-----|---------|-------|
| tour_number | int          | NO   | PRI | NULL    |       |
| tour_Name   | varchar(233) | NO   |     | NULL    |       |
| Duration    | varchar(233) | NO   |     | NULL    |       |
| price       | float        | NO   |     | NULL    |       |

```
4 rows in set (0.00 sec)
```

## 12)Toured2 Table

create table Toured2

```
(  
    passenger_number int not null,  
    cruise_number int not null,  
    tour_number int not null,  
    Date1 date not null,  
    foreign key(passenger_number) references passenger(passenger_number),  
    foreign key(cruise_number) references cruise(cruise_number),  
    foreign key(tour_number) references tour(tour_number)  
);
```

```
mysql> desc toured2;
```

| Field            | Type | Null | Key | Default | Extra |
|------------------|------|------|-----|---------|-------|
| passenger_number | int  | NO   | MUL | NULL    |       |
| cruise_number    | int  | NO   | MUL | NULL    |       |
| tour_number      | int  | NO   | MUL | NULL    |       |
| Date1            | date | NO   |     | NULL    |       |

4 rows in set (0.01 sec)

## 13)Passenger\_Contact Table

create table passenger\_Contact

```
(  
    passenger_Number int not null,  
    Telephone int not null,
```

```
foreign key(passenger_Number) references passenger(passenger_Number)
);
```

```
mysql> desc passenger_Contact;
```

| Field            | Type | Null | Key | Default | Extra |
|------------------|------|------|-----|---------|-------|
| passenger_Number | int  | NO   | MUL | NULL    |       |
| Telephone        | int  | NO   |     | NULL    |       |

2 rows in set (0.01 sec)
